Evelyn Millares, NASA Computer Engineer

Evelyn Millares is a visionary engineer of Virtual Reality Technology at NASA, the US American space agency.

Evelyn Millares was born in Caracas, Venezuela, in 1967. At high school, she wanted to be an architect because she wanted "to build something". Then she went to university in the United States. There she became a computer engineer.

Today Evelyn Millares is an Engineer and Technology Strategist at NASA. She directs an extraordinary team of engineers. She also trains astronauts in the VR programme for the Mars Mission!
